

Shopping Website – Daily Frontend Progress Report

Date: 30th July 2025

Developer: Ome Prakash

Today's Objectives :

- Implement cart system with:
- Cart count notification on all pages
- Product details and image display in the cart
- Improve search functionality
- Prepare account page with placeholders for order history
- Finalize frontend design and animations

Cart Page Features :

- Displayed:
 - Product name
 - Product image
 - Price
 - Remove button
- Cart Summary section:
 - Total MRP
 - Discount (10% if items exist)
 - Platform fee (₹20)
 - Final total

Cart Notification :

- Notification badge appears on cart icon
- Badge updates live when item is added or removed
- Shared across:
 - Products page
 - Cart page
 - Account page

Search Bar :

- Live search feature implemented
 - User can:
 - Type in product name/keywords
 - Filter visible product cards dynamically
 - Smooth UI transition with CSS
- 
- A decorative graphic element in the bottom right corner of the slide, consisting of a smooth gradient from light orange to teal, forming a curved, abstract shape.

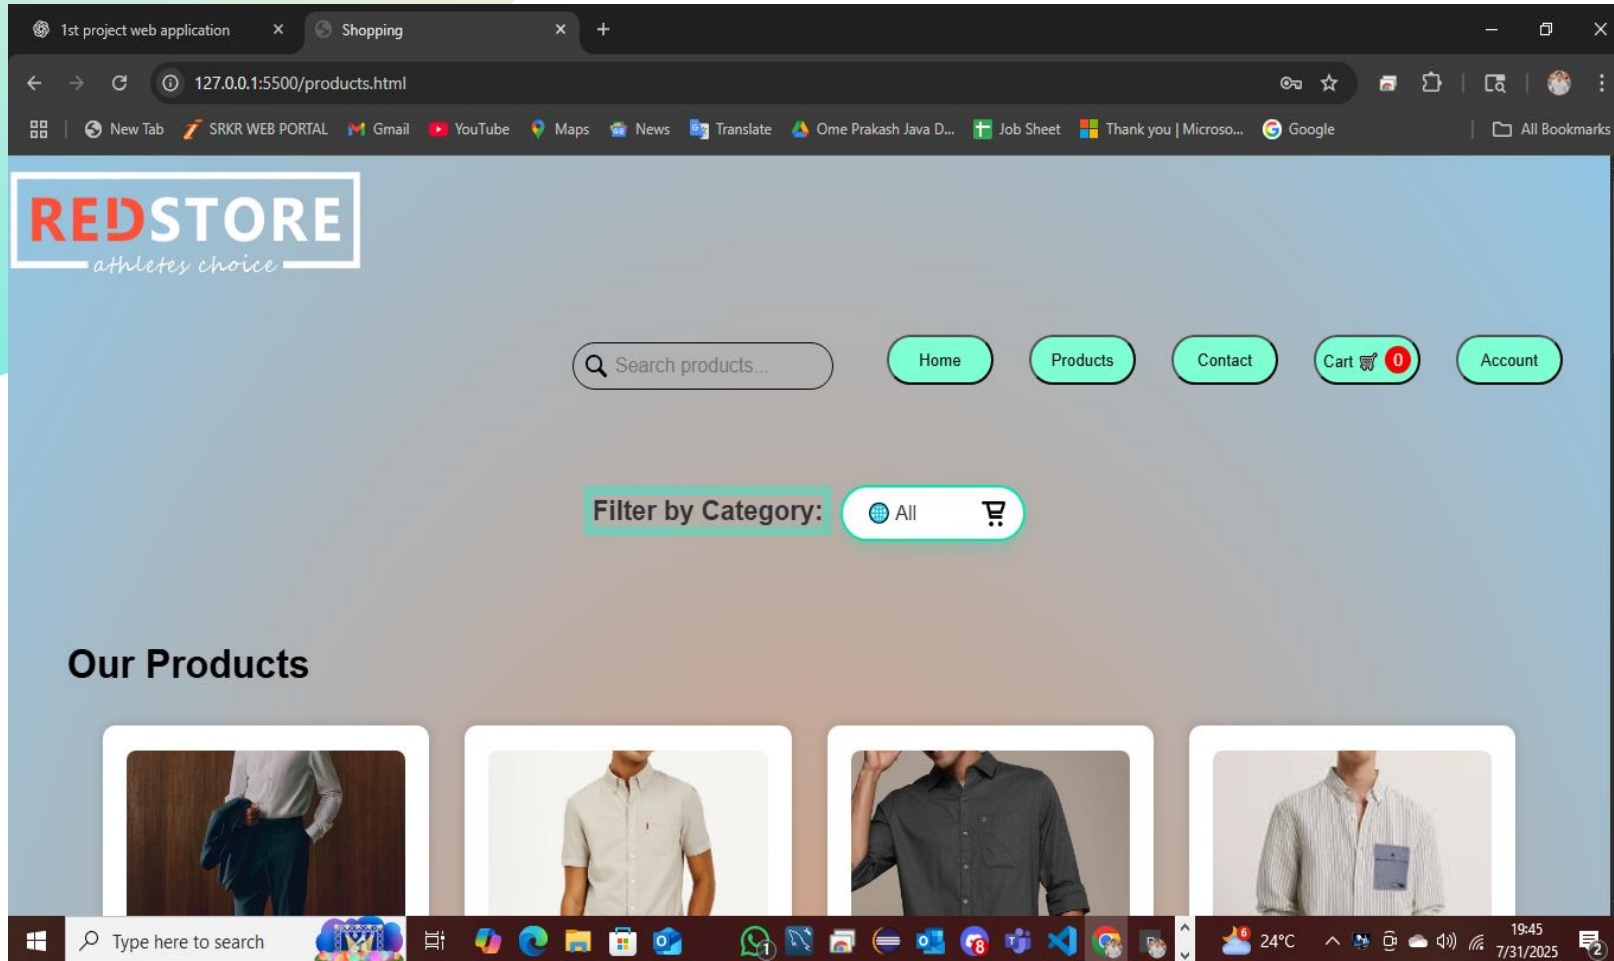

Account Page Setup :

- Displays user profile details:
- Name, Email, Phone, Username
- Sidebar for future features:
- Order history
- Coupons
- Search and logout options functional
- Ready for backend integration (Spring Boot & MySQL)

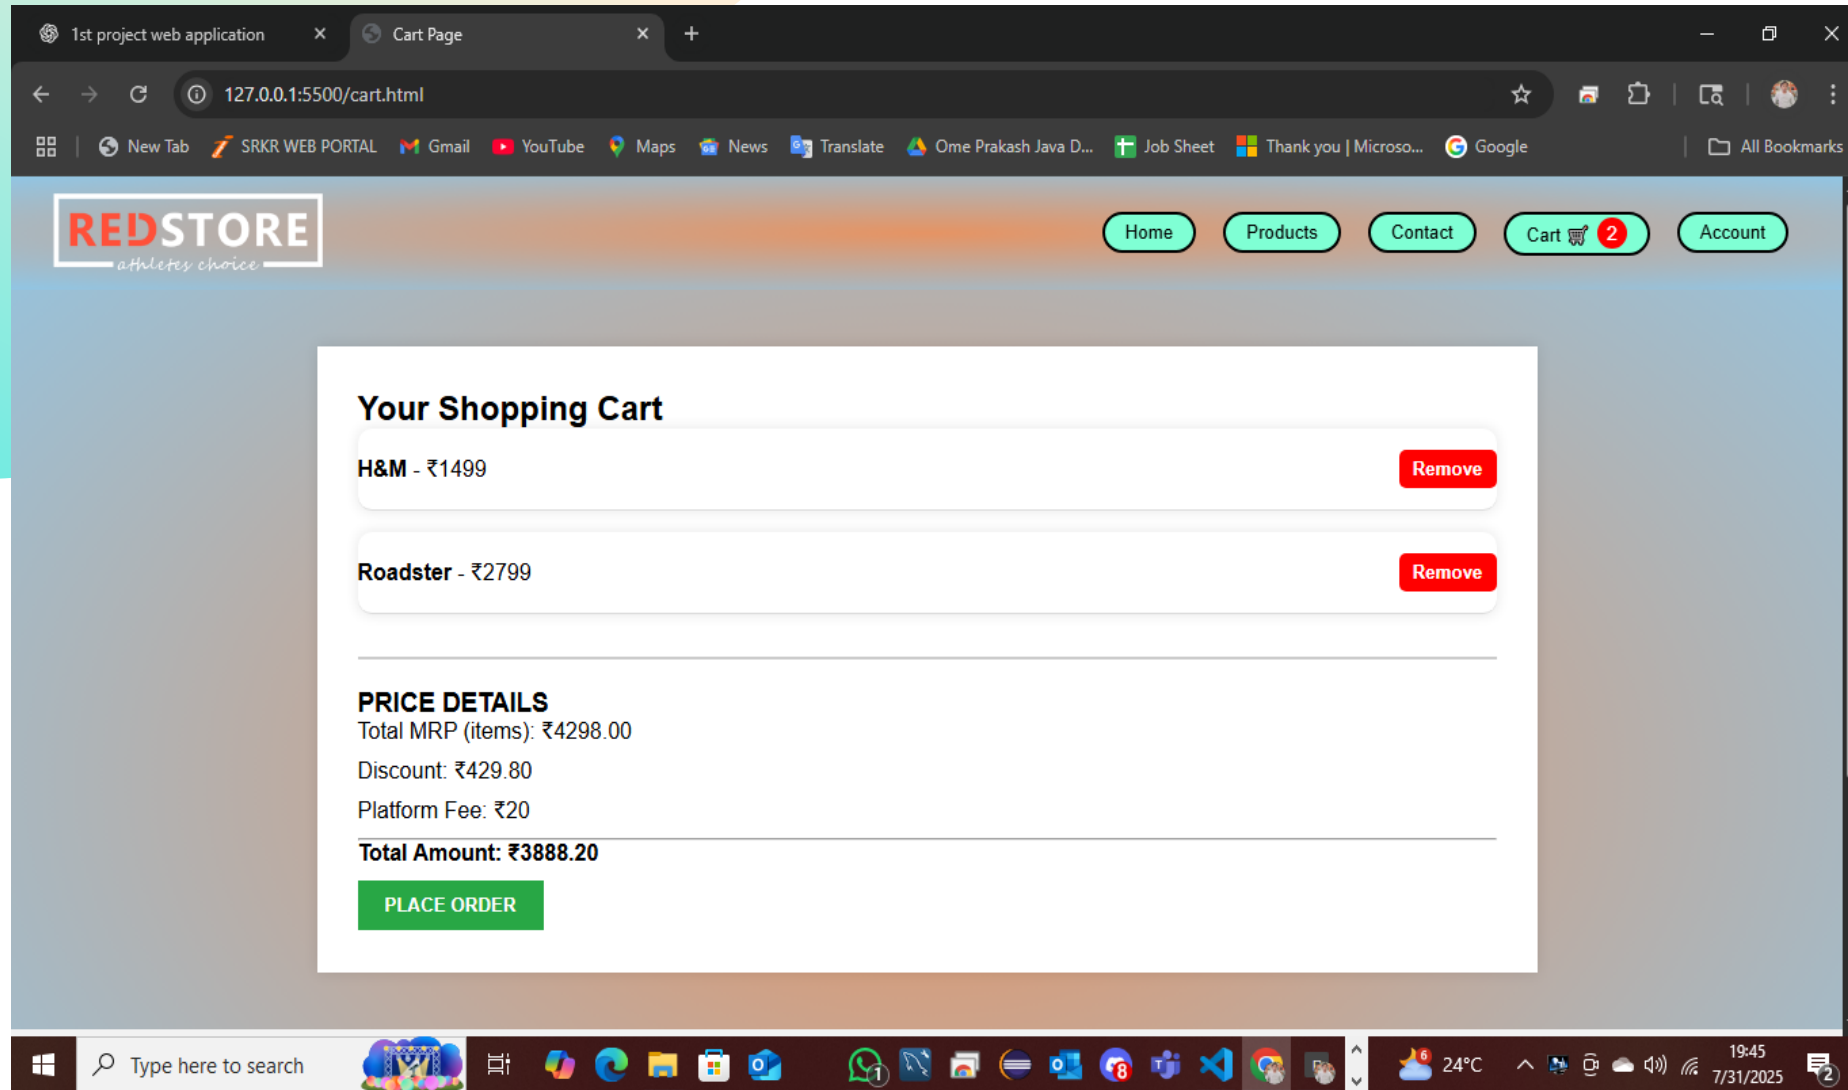

Design Enhancements :

- Gradient backgrounds and animations
 - Responsive buttons with hover effects
 - Clean layout for:
 - Cart
 - Account
 - Navigation
 - Icons, images, and brand logos added
- 
- A decorative graphic in the bottom right corner of the slide. It consists of two overlapping, rounded shapes. The top shape is a teal color, and the bottom shape is an orange color. They are positioned such that they appear to be part of a larger, abstract design element.
